

NFPA 70e/OSHA

ARC FLASH/ELECTRICAL SAFETY AWARENESS TRAINING

Compliant with
NFPA 70e/OSHA Standards

This course meets the
mandated training requirements
of OSHA 1910.332.

APRIL 27-28, 2015
LOS ANGELES, CA

APRIL 29-30, 2015
SAN FRANCISCO, CA

2-day course
\$799

REGISTRATION INCLUDES:

- 100+Page Digital Electrical Safety Digital Handbook
- \$100 Coupon toward any future 2015-16 Electricity Forum event (*restrictions apply*)
- Workshop Presentations in Paper Format
- 1.4 CEU Credits and Course Certificate
- FREE EasyPower Arc Flash Software Demo CD
- Register 3 get 1 Free (see details on page 4)

ALL-NEW INTERACTIVE ARC FLASH & ELECTRICAL SAFETY WORKSHOP

PROGRAM DETAILS: WWW.ELECTRICITYFORUM.COM/USA/NFPA70E-OSHA-TRAINING.HTML

Our ALL-NEW And INTERACTIVE Arc Flash/Electrical Safety Workshop Teaches Students How To Be Compliant With California Electrical Safety Standards AND The NFPA-70e Electrical Safety in the Workplace Standard.

OUR NEW ARC FLASH/ELECTRICAL SAFETY WORKSHOP PROVIDES:

- Advice on integrating electrical safety programs into OHS management systems
- Best safety practices for work on and around electrical equipment
- Guidance on due diligence in prevention of electrical injuries
- Methods for identifying electrical hazards and assessing risk
- Targets for electrical hazard awareness and training for workers
- Important changes to the new edition include:
 - Improved direction on hazard identification and risk assessment
 - New safety procedures and assessment tables for work around DC systems
 - New tables for the selection of personal protective equipment
 - Added guidance on safe procedures and training
 - The latest information on safety around high-voltage systems and electrostatic discharges
 - New information on safety management systems, hazard identification, and risk assessment

DAY ONE: NFPA-70e ARC FLASH/ELECTRICAL SAFETY WORKSHOP

UNDERSTANDING ELECTRIC POWER SYSTEMS

- Basic Electrical Theory and Definitions
- Electrical Drawings
- Ground Fault Systems
- Time-Current Curves & Power System Studies
- Electrical Arc Characteristics

OVERVIEW - VIDEO

- Electrical Hazards
- Existing and Proposed Standards
- Preparing to Work Safely
- Determining Safe Approach Distance
- Determining Arc Hazard Category
- Fault Current Calculations
- Determination of Arcing Fault Clearing Time
- Boundary Calculations
- Determining Arc Flash Hazard Risk Category
- Incident Energy Exposure Calculations
- Hazard Analysis

INCIDENT CAUSES

- Unsafe Switching Acts
- Not following Operating Procedure
- Unsafe Working Conditions
- Not Following Maintenance Procedures

ELECTRICAL HAZARDS

- 5 Main Factors in Electrical Accidents
- Electrical Shock
- Arc Flash Defined
- Incident Energy Defined
- Arc Flash Burn Injuries
- Arc Blast Pressure
- Inhalation Injuries

EXISTING AND PROPOSED STANDARDS

- OSHA 1910.269
- NFPA 70e-2012 Edition
- NESC Rule 410A3

DEFINITIONS

- Essential to the Application of This Standard

PREPARING TO WORK SAFELY - Group Discussion, Exercise and VIDEO

- Safety Training
- Emergency Procedures
- Detailed Description of a "Job Briefing"
- Use of Equipment
- Establishing an Electrically Safe Work Condition
- Lockout/Tagout

Physical Demonstration and VIDEO

- Isolation and Grounding

HAZARDOUS ENERGY CONTROL PROCEDURES

- Individual Qualified Employee Control Procedure
- Simple Lockout/Tagout Procedure
- Complex Lockout/Tagout Procedure
- Coordination
- Training and Retraining

EQUIPMENT

- Lock Application
- Lockout Tagout Device
- Lockout Device
- Tagout Device
- Electrical Circuit Interlocks
- Control Devices
- Procedures
- Planning

SHOCK HAZARD PROTECTION - Discussion, Exercise and VIDEO

- Understanding and Applying NFPA 70e Tables
- Shock Protection Boundaries
- Limits of Approach
- Energized Work Permit

- Limited Approach Boundary
- Restricted Approach Boundary
- Prohibited Approach Boundary

DETERMINING ARC HAZARD RISK CATEGORY (LIVE WORK)

- Using NFPA 70e Table Method

BOUNDARY CALCULATIONS

- Detailed Examples and Exercises

DETERMINING ARC FLASH HAZARD RISK CATEGORY - Discussion, Exercise and VIDEO

- Detailed Examples and Exercises
- Simplified Table Approach
- Matrix Table Approach
- Single Line Diagram
- Short Circuit Study
- Coordination Study
- NFPA 70e Table – Protective Clothing and PPE Matrix

INCIDENT ENERGY EXPOSURE CALCULATIONS

- Selecting the Correct Level of PPE
- NFPA 70e Calculation Method
- Calculating Arc in a Cubic Box
- Comparison of "Arc in Open Air" to "Arc in a Box"
- IEEE 1584 Method

ELECTRICAL HAZARD LABELS, ARC FLASH AND SHOCK LABELS - Discussion, Physical Demonstration

- General
- National Electrical Code Shock and Arc Flash Warning Label
- Arc Flash Label Example
- Detailed Arc Flash Hazard Analysis Label

The Electricity Forum is a trusted leader in Electrical Safety training. More than 10,000 Electrical Professionals have turned to our company for unbiased, objective, commercial-free Electrical Safety training. Our motivation is your education!

PPE CLOTHING REQUIREMENTS, FR CLOTHING TESTING STANDARDS - Discussion, Physical Demonstration

- The Evolution of Flame Resistant (FR) Fabrics
- The Various Types of FR Fabrics that are Available in the Marketplace
- FR Fabrics and the Effects of Undergarments

- Review the Technology and Effectiveness of Inherently Flame Resistant Fibers vs. Chemically Treated Fabrics
- Developing a PPE Program in Your Company
- Assessing the Correct Arc Flash Hazard and Choosing the Right Level of Protective Clothing
- Company Training and Worker Compliance
- A Quiz to Ensure Student Understanding of the Day's Information

ARC FLASH SOLUTIONS

- Arc Flash Study Analysis and Implementation
- Power System Upgrades
- Arc Resistant Switchgear
- Circuit Breaker Retrofitting
- Remote Breaker Racking
- Regular Maintenance and Testing

DAY TWO: OSHA ELECTRICAL SAFETY WORKSHOP

OSHA Electrical Safety training is designed for industrial, commercial and institutional electricians, technicians, and engineers. They must be properly trained in all aspects of safety, maintenance, and operating procedures in order to do their jobs properly on complex electrical equipment and systems today.

OSHA Electrical Safety regulations require all employers to document that their employees have demonstrated proficiency in electrical tasks before they can certify that they have been adequately trained. Also, employers must maintain this certification for the duration of the employee's employment.

Some OSHA electrical training regulations go even further by making it the employer's responsibility to limit certain job assignments to employees who are "certified", "competent", or "qualified", meaning that they have been specially trained to perform specific or specialized tasks. These requirements reflect OSHA's belief that training is an essential part of every employer's health and safety program.

This OSHA Electrical Safety training course is designed to meet the minimum mandated requirements specified in OSHA 29CFR 1910.331 to 335 for those employees classified as "qualified" who work on or near exposed electrical parts operating at 50 volts or more, or for those employees classified as "unqualified" but who are exposed to electrical hazards during their job duties. This also includes those who supervise both qualified and unqualified personnel who are exposed to electrical parts operating at 50V or more.

SCOPE - OSHA STANDARD 1910.331

- Section 1910.331(a) - Covered Work by Both Qualified and Unqualified Persons
- Section 1910.331(b) - Other Covered Work by Unqualified Persons
- Section 1910.331(c) - Excluded Work by Qualified Persons

TRAINING - OSHA STANDARD 1910.332

- Section 1910.332(a) - Scope
- Section 1910.332(b) - Content of Training
- Section 1910.332(c) - Type of Training

SELECTION AND USE OF WORK PRACTICES - OSHA STANDARD 1910.333

- Section 1910.333(a) - General
- Section 1910.333(b) - Working on or Near Exposed De-energized Parts
- Section 1910.333(c) - Working on or Near Exposed Energized Parts

USE OF EQUIPMENT - OSHA STANDARD 1910.334

- Section 1910.334(a) - Portable Electric Equipment
- Section 1910.334(b) - Electric Power and Lighting Circuits
- Section 1910.334(c) - Test Instruments and Equipment
- Section 1910.334(d) - Occasional Use of Flammable or Ignitable Materials

SAFEGUARDS FOR PERSONNEL PROTECTION - OSHA STANDARD 1910.335

- Section 1910.335(a) - Use of Protective Equipment
- Section 1910.335(b) - Alerting Techniques
- Personal Protective Equipment
- Protective Techniques
- Electrical Protective Equipment
- Arc Protective Equipment
- Blast Protective Equipment
- Other Protective Equipment
- Energy Detection Equipment

OSHA 29 CFR 1910.302-303

- Subpart 'S' Safeguarding of Employees
- 302 - Electric Utilization Systems
- 303 - General Requirements
- Working Space About Electrical Equipment
- Restrictions on Personnel Access to Electrical Equipment
- Use of Portable Equipment

OSHA 1910.269 - ELECTRIC POWER GENERATION, TRANSMISSION, AND DISTRIBUTION

- Electric Power Generation, Transmission and Distribution
- Operation and Maintenance of Generation and Distribution Equipment

OSHA 29 CFR 1910.132 & 137

- Personal Protective Equipment
- 132 - General Requirements for PPE
- 137 - Electrical Protective Devices

OSHA 29 CFR 1910.147

- Lockout/Tagout
